

HACK**REGINA**

Community Sponsorship

## WHO ARE WE?

- - - - X

HackRegina is the beginning of a strong and well-known tech community for Regina, SK. The non-profit organization started as a small Slack channel but has begun to grow into a community for software developers to share knowledge and get to know one another. Through hosting events and our Slack channel, we hope to create a network of Regina tech companies to both share knowledge and help Regina stay ahead of the latest technologies.

---

## ACTIVITIES

- - - - X

We are planning on hosting the following types of events throughout the year:

- Hackathons
- Code Together Nights
- Educational Talks

### Hackathons

A hackathon is an event that gathers groups of people with technical backgrounds to deliver various software solutions within a short period of time. We want participants to provide solutions that both spark creativity and provide business value.

### Code Together Nights

A Code Together night is an event to get a group together and work on anything that interests the participants. This event provides a shared space for participants to either: discuss and receive feedback on their projects or just code with peer motivation.

### Educational Talks

We are planning talks for the community to share their knowledge to help Regina stay ahead of new and popular technologies for developing applications and software solutions.
