

HACKREGINA

Community Sponsorship

WHO ARE WE?

- - - - x

HackRegina is a strong and well-known tech community for Regina, SK. The non-profit organization started as a small Slack channel but has begun to grow into a community for software developers to share knowledge and get to know one another. Through hosting events and our Slack channel, we hope to create a network of Regina tech companies to both share knowledge and help Regina stay ahead of the latest technologies.

ACTIVITIES

- - - - X

We are planning on hosting the following types of events throughout the year:

- Hackathons
- Code Together Nights
- Industry Talks
- Development Workshops

Hackathons

A hackathon is an event that gathers groups of people with technical backgrounds to deliver various software solutions within a short period of time.

Code Together Nights

A Code Together night is an event to get a group together and work on anything that interests the participants. This event provides a shared space for participants to either: discuss and receive feedback on their projects or just code with peer motivation.

Industry Talks

We are planning talks for the community to share their knowledge to help Regina stay ahead of new and popular technologies for developing applications and software solutions.

Development Workshops

Workshops presented by developers for developers to assist with the continuous professional growth demanded by our industry.

Sponsorship Opportunities

- - - - X

As a non-profit organization, any donations are appreciated to help grow our tech community and host our events. As a sponsor, your organization will have your logo or name featured on our all of social media accounts and communication channels.
